**Objectives:**

1. Establish a platform where peoples who have been, and or are likely to be victims of or perpetrators of war crimes and crimes against humanity (particularly genocides) can share experiences and ideas of preventing such dastardly acts.

2. Identify early warning signals and locations where similar crimes are likely to be committed across the world with a view to focusing global attention at such areas and preventing the commission of such crimes.

3. Explore avenues to ameliorate the adverse impact (psychological, physiological, developmental and otherwise) of war crimes and crimes against humanity on the victims and perpetrators alike.
