DATA SOVEREIGNTY ALONG THE DIGITAL SILK ROAD (co-editor with Haochen Sun)
(Oxford University Press 2023)

- Reviewed in *Science* (Dec. 2023) (“an insightful exploration of data sovereignty, shedding light on the multifaceted challenges that lie ahead in the evolving landscape of data governance”).

THE ELECTRONIC SILK ROAD: HOW THE WEB BINDS THE WORLD TOGETHER IN
COMMERCE (Yale University Press, July 2013; Cambridge University Press for South
Asian edition with new foreword, February 2014; licensed for Chinese translation by
Law Press, Beijing)

- “A visionary read . . . I commend this book to all those who think about a future that is to be faced and not feared.” Mike Moore, Former Prime Minister of New Zealand, Former Director General of the World Trade Organization, New Zealand Ambassador to the United States
- “A masterly analysis,” “a tour de force” Jagdish Bhagwati, University Professor, Columbia University
- “An important guide to outdated rules governing global online trade,” *Financial Times*
- “An important contribution to thinking about the international legal order,” Ricardo Ramírez-Hernández, Chair of the Appellate Body, World Trade Organization
- “Extraordinarily lucid . . . This is an important book.” W. Michael Reisman, Myres S. McDougal Professor of International Law, Yale Law School

- “A must read for those interested in globalization,” United States Senator Chris Coons
- “A fascinating journey... Anyone interested in the digital transformation of commerce should consider carefully Chander’s insights,” Mark Wu, Harvard law professor
- “Chander beautifully weaves together theory, practice, trade, culture, and politics into a complex yet clear argument, a sophisticated yet down-to-earth analysis, and a beautifully written text,” Michael Birnhack (Tel Aviv), book review in 108 *Am. J. Int’l L.* 562, 568 (2014).
- “[F]illed with insight, delightfully well written and a source for further inquiry,” Jeffery Atik (Loyola L.A.), in book review for the *World Trade Review* (2015)
- “A compelling case . . . fascinating.”—Glenn C. Altschuler, *Huffington Post* (Cornell University Vice President for University Relations, the Dean of the School of Continuing Education and Summer Sessions, Thomas and Dorothy Litwin Professor of American Studies)
- “Chander’s book is a knowledgeable and a timely intervention . . . recommended for those who want to peek into the nuts and bolts of the internet, understand the application of the law that guides it, and finally, follow the smell of money!” Mahima Kaul, Observer Research Foundation (New Delhi)
- “Chander’s work should be required reading on the linkage of freedom of speech, commercial data gathering, and government access, and his prose style renders seemingly mundane details as both consequential and easy to understand.”—*Publishers Weekly*
- “This book is a delightful read, both for its topicality and for the clarity, humour and expertise that Chander brings to a persuasive argument in favour of law in the world of e-commerce.... The gravitas of these issues is interspersed with almost ironic references to economic history, philosophy and literature...” Marian De Saxe (University of Sydney) in Media International Australia
- “This interesting book . . . suggests ways that countries can benefit from the many positive aspects of an open Internet while still preserving democratically determined preferences about what content should be allowed online and what data should remain private.” *Foreign Affairs* (Nov./Dec. 2013)
- Interviews discussing book appearing in *Publishers Weekly* (July 27, 2013) and the *Chronicle of Higher Education* (August 2013)
