

Automated External Defibrillator (AED)

Georgetown University
Law Center

Director Fred Rogers
Department of Public Safety
September 14th, 2021

An AED, or Automated External Defibrillator, is used to help those experiencing sudden cardiac arrest. It's a sophisticated, yet easy-to-use, medical device that can analyze the heart's rhythm and, if necessary, deliver an electrical shock, or defibrillation, to help the heart re-establish an effective rhythm. <https://www.redcross.org/take-a-class/aed/using-an-aed/what-is-aed>

A blue line-art illustration of the Georgetown Law clock tower, a tall brick structure with two clock faces at the top. The text "GEORGETOWN LAW" is superimposed in a dark blue serif font across the middle of the tower.
